

ANUANSH TIWARI

Software Engineering / AI-Security Research Intern Candidate

Lucknow, Uttar Pradesh, India | [+91-9871503105](tel:+91-9871503105) | anuanshtiwari191@gmail.com | linkedin.com/in/anuansh | github.com/glassgotlazv | [ORCID 0009-0007-4226-7925](https://orcid.org/0009-0007-4226-7925)

PROFESSIONAL SUMMARY

Computer Science engineering student (B.Tech CSE, Amity University Uttar Pradesh — Lucknow, 2025–2029) and IEEE Student Member working at the intersection of applied security and generative AI. Author of two IEEE/Springer-format research manuscripts on LLM-enabled cyberattacks and AI-based resume screening; presented at ICETA 2026 (NITRA Technical Campus, Ghaziabad). Work is measurement-first rather than citation-first: a first-party prompt-filter experiment over an n=880 corpus, NVD-verified CVE data, and reproducible matplotlib figure and data pipelines. Ships offline-first, zero-dependency web tools (a 53-tool browser PDF suite, a single-HTML health tracker) and production Node.js/Express services built on Gemini, Claude, ElevenLabs and Twilio APIs, using Claude Code and Cursor daily to raise shipping velocity.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), C, HTML5, CSS3, LaTeX

Frameworks & Runtimes: Node.js, Express.js, REST API design, single-file offline web apps, Web Bluetooth API

AI & APIs: Anthropic Claude API, Google Gemini API, ElevenLabs Conversational AI, Twilio Voice, Claude Code, Cursor, GitHub Copilot — used daily for build and research iteration

Data & ML: pandas, NumPy, scikit-learn, matplotlib, TF-IDF vectorization, NLP preprocessing, EDA, model training & evaluation

Security: LLM and prompt-injection security, agentic-AI threat modelling, CVE/NVD analysis, post-quantum cryptography (ML-KEM), TLS 1.3 handshakes, network and smart-building security

Research & Docs: IEEE and Springer formatting, PRISMA-informed review methodology, python-docx / docx.js / LaTeX document pipelines, programmatic figure generation, Turnitin workflows

Tools: Git, GitHub, VS Code, Postman, Vercel

EDUCATION

Amity University Uttar Pradesh, Lucknow — Amity School of Engineering and Technology

2025 – 2029

B.Tech in Computer Science and Engineering | Enrollment No. A7605225097 | CGPA: 7.48 / 10

RESEARCH & PUBLICATIONS

- **Weaponizing Generative AI: A Survey of LLM-Enabled Cyberattacks in Phishing, Malware Generation, and Social Engineering** — presented at ICETA 2026, NITRA Technical Campus, Ghaziabad (17–18 July 2026). Includes a first-party safety-filter experiment over an n=880 prompt corpus rather than reported third-party figures.
- **AI-Based Resume Screening Systems: A Critical Review of Techniques, Failure Cases, and Industry Adoption (2024–2026)** — PRISMA-informed review of 75 sources with a 51-study coded corpus; formatted for a Springer venue and presented as an 8-minute conference talk.

EXPERIENCE

Industrial Trainee — BSNL ALTTTC, Ghaziabad

Jun – Sep 2026

- Completed industrial training in Integrated Telecom / Data Networks and Cyber Security; earlier produced a project report on security aspects in a smart building (Mar–Apr 2026) covering LAN and server-room infrastructure.

Research Intern (NTCC) — Amity University, Lucknow

Jun – Jul 2026

- Built and evaluated an AI resume-screening pipeline end to end — EDA, data cleaning, NLP preprocessing, TF-IDF feature extraction, then model training and evaluation — and wrote the accompanying critical review under Prof. (Dr.) Wajahat Rizvi.

HVCO Intern — Yuva Yoddha, Lucknow

Jun – Jul 2026

- Ran a five-week "Legal Rights Awareness Campaign: Know Your Rights, Protect Your Future": produced posters and an animated explainer, designed a 10-question survey in six languages, ran an offline community campaign and analysed the responses. Awarded a Certificate of Appreciation by the founder.

Programme Intern — Each One Feed One, New Delhi

Jun – Sep 2026

- Supported an education-access programme alongside concurrent research and training commitments.

PROJECTS

Amity Admissions Assistant — AI Chatbot with Voice Callback

2026

Node.js, Express.js, Google Gemini API, ElevenLabs Conversational AI, Twilio

- Built an admissions assistant chatbot for Amity University Lucknow as an Express service backed by the Gemini API, handling prospective-student queries through a single-page client.
- Added a voice "callback" channel on ElevenLabs Conversational AI plus Twilio, validated on free tiers first, and authored a university funding proposal covering the feature set and projected per-call API cost.

Offline PDF Toolkit — Local, No-Upload PDF Suite · [GitHub](#) · [Live Demo](#)

2026

Python, Streamlit, PyMuPDF, pypdf, pikepdf

- Shipped a six-category PDF suite — organize, security, convert, edit, extract and annotate — covering merge, split, rotate, encrypt, permission control, watermark, redact, compress and format conversion. Every operation runs in memory on the local machine with no external API calls and no network at runtime, so documents never leave the user's machine.

GlucoLog Pro — Offline Single-HTML Health Tracker

2026

JavaScript, Web Bluetooth API, client-side image parsing

- Built a fully offline glucose and health tracker delivered as one self-contained HTML file, including a CGM screenshot digitizer that recovers numeric series from sensor screenshots, Whoop data integration and Web Bluetooth device support.

LEADERSHIP & ACTIVITIES

- **IEEE Student Member** — active in the student research community; presenting author at ICETA 2026.
- **Research collaboration** — recurring co-author with peers across institutions, including reformatting and review support on an XAI systematic review.
